

EDN_LCD-CJ-104AHB-RTU : 10.4" High Brightness Sunlight Readable Industrial LCD Monitor With Touch

Overview

The Eden 10.4" industrial touch screen computer monitor is a high brightness sunlight readable VGA touch screen display that is ideal for commercial vehicle PC installations that require a more rugged solution. This monitor is also ideal for industrial computing applications such as factory use, automation and other industrial uses.

The Eden Industrial 10.4" High Brightness Sunlight Readable Touchscreen Display features an 800nit LED backlit panel to enable sunlight and daylight readability. LED backlighting technology provides superior results compared to traditional CFL backlighting and features lower power consumption and heat generation.

Not only is the Eden Industrial 10.4" High Brightness Sunlight Readable Touchscreen Display one of the most affordable compact vehicle mount touch screen LCD monitors on the market but its also one of the thinnest and lightest!

The display also features a composite video and audio input and S-VIDEO input for the connection of external video sources such as a camera or DVR system.
