

G-NET Canada - Car Computing ... a revolution in mobile computing

CAMBRIDGE, ON — A systems integrator based in Ontario, Canada, has released the ultimate mobile computing device, the "Revolution Auto PC". The Revolution is a full-blown in-vehicle computer system that not only allows users to play MP3's, digital video, DVD and use PC applications in their car but also supports GPS navigation, vehicle diagnostics, wireless Internet and e-mail.

The Revolution Auto PC fills the void between the home/office PC and the notebook computer.

"By putting a true car based computer in your vehicle you open up a whole new world of opportunities," said Shawn Gusz, President of G-NET Canada. "The possibilities are truly endless, imagine being able to drive across the country without getting lost, or how about keeping the kids entertained with a DVD movie on the way to the cottage? What if you could wirelessly videoconference with your business partner who is half way around the

Above, G-NET president Shawn Gusz is pictured with a revolution in car computing at Dark Nights, Toronto. At right, the unit is small enough to fit in the glovebox of this Porsche.

"We have shipped our products all around the world and the Revolution Auto PC is being adopted by many car audio enthusiasts, mobile professionals, real estate agents as well as the average person who just wants something new and cool in their car," Gusz said.

tomers, proprietary units made by the big car audio companies are priced two or three times higher than that and have very limited functionality, putting a PC in your car running Windows 98/ME leaves all your options open," said Gusz.

The system consists of a tiny computer, small LCD screen and touch pad mounted in your vehicle. The Revolution Auto PC can be easily installed into nearly any vehicle; G-NET has a wide range of LCD display and hardware options to meet the needs of any user.

"The car computing market is expected to double its size by the year 2003 and expected to reach \$400 billion by 2015, and we plan to lead the way," Gusz said. G-NET Canada does and will continue to provide innovative mobile computing solutions to the world.

For more information on the Revolution Auto PC please visit the G-NET Canada web site at <http://www.gnetcanada.com> or call 519-623-4901.

So what does it take to get one of these systems in your car? Not much. The Revolution Auto PC has a base price of \$1595 USD including the LCD screen.

"That's a huge benefit to our cus-
